

CLOUD PHONE

Manage Smarter. Work Faster.

NEXT-GEN MOBILE DEVICE MANAGEMENT

Total Visibility. Total Control. One Platform for Your Team Workforce.

A unified MDM + CRM platform to track, secure and analyze every company-owned device — calls, location, apps and field activity, in real time.

Real-Time Analytics

Cloud-Native

Presented by: Cloud Mobile by Codespur

Teams Are a Black Box for Most Businesses

No Visibility

Managers can't see what field staff are doing, where they are, or whether company SIMs/devices are used for work.

Missed Opportunities

Missed customer calls go untracked — no follow-up, no accountability, lost revenue.

Misuse of Devices

Personal app usage, data leaks and idle time go unchecked on company-owned phones.

Lost or Stolen Devices

No way to locate, lock or wipe a lost device — risking sensitive business data.

The result: lost productivity, security risk, and zero data to make decisions on.

THE SOLUTION

One Platform. Every Device. Total Control.

Our MDM-CRM suite gives you a single dashboard to monitor, secure and analyze every company device — turning raw activity into actionable business intelligence.

Alerts Open

Call Volume — This Week

Integration — Everything Syncs, Automatically

Data and File Sync

Continuous two-way sync of device data with the central dashboard — always current.

Call Log Sync

Every incoming, outgoing and missed call synced in real time from each device.

Live Recording

Calls recorded live and pushed to secure cloud storage as they happen.

Missed Call Tracking

Instant flags on missed customer calls so no lead or query is ever dropped.

Access Complete Device

Full remote access to every enrolled device — apps, files, settings and activity, all from one central dashboard.

Plug-and-play integration — no disruption to existing telephony or CRM workflows.

Access — Deep Device-Level Visibility

Battery Percentage

Live battery levels across the Team to flag offline-risk devices.

Network Status

Real-time connectivity, signal strength and network type per device.

Default caller App

Full call history — numbers, duration, type — accessible centrally, Pop up with caller id.

Location Tracking

Live GPS location and movement history for every field device.

Message Integration

Message logs integrated for complete communication visibility.

One dashboard. Every device. Permission-based access keeps data compliant and secure.

Security — Protect Every Device, Every Moment

App Restriction

Block or whitelist apps to stop misuse and protect productivity.

Phone Lost Tracing

Instantly trace the last known location of a lost or stolen device.

Data Secure

Encrypted storage and remote wipe to protect sensitive business data.

SOS / Custom Alerts

One-tap SOS and configurable alerts for emergencies or policy breaches.

Remote Phone Blocking

Lock a device remotely in seconds the moment a risk is detected.

Zero compromise on data security — built to enterprise compliance standards.

Monitoring — The Full Picture, On Demand

Complete Phone Log

Unified activity log — calls, apps, messages, location in one timeline.

Zero-Touch Setup

Devices auto-enroll and configure out of the box — no manual setup.

WhatsApp Access

Visibility into WhatsApp usage patterns for compliance and productivity.

Instant Cloud Recording

Call recordings uploaded to the cloud instantly — nothing stored only on-device.

File Manager

Browse, audit and manage files stored on any enrolled device remotely.

WhatsApp Live Call Monitor

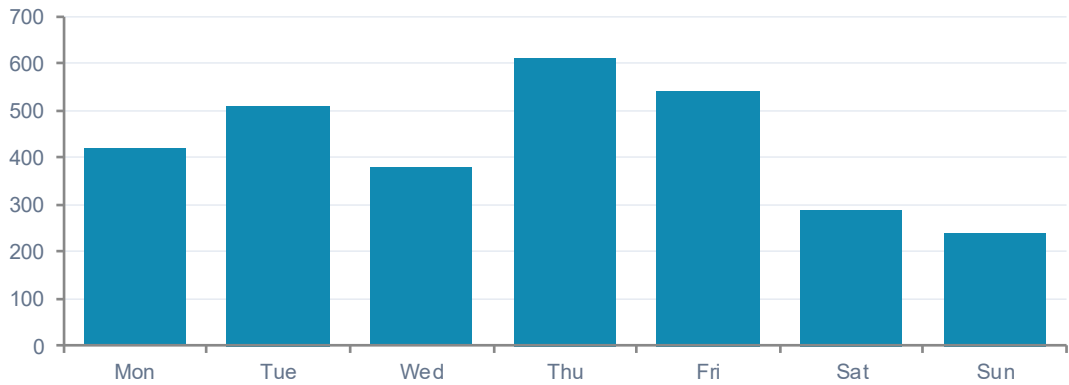

Track WhatsApp call activity and duration alongside regular call logs.

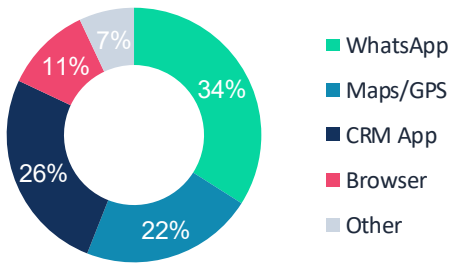

From a single screen, see exactly how every device is used — nothing hidden, nothing missed.

Traditional Tracking vs. Our MDM Platform

Capability	Manual / Legacy	Our MDM Platform
Device visibility		
Real-time call & app analytics		
AI-powered call analysis		
Live call recording to cloud		
Remote lock / wipe on loss		
Zero-touch device enrollment		
WhatsApp usage & call monitoring		
SOS & custom alerting		

Why Enterprises Choose Our Platform

Up to 100% Productivity Gain

Data-driven visibility into Work activity drives accountability and output.

Zero Data Loss Risk

Remote lock, wipe and encrypted storage protect company data 24/7.

Faster Response Time

Missed-call and SOS alerts cut customer response time dramatically.

Easy Rollout

Zero-touch enrollment gets your entire fleet live in under a day.

Built for fleets of any size — from 20 devices to 20,000. Flexible engagement: Manage Smarter. Work Faster.

Transparent Pricing. No Hidden Charges.

Straightforward, per-device pricing — what you see in the quote is exactly what you pay. No setup traps, no surprise add-ons.

Flat Per-Device Fee

One predictable monthly rate per enrolled device — scales simply as your fleet grows.

One time Setup Fees

Zero-touch onboarding and configuration included at one time cost.

No Hidden Add-Ons

Security, monitoring, analytics and AI call analysis are all included — not sold separately.

Clear Itemized Invoicing

Every invoice breaks down exactly what you're billed for, with no fine print.

Starter

20–100 devices

Core MDM + Access + Security

Growth

100–1,000 devices

+ AI Call Analysis + Monitoring Suite

Enterprise

1,000+ devices

+ Custom SLAs + Dedicated Support

Exact rates shared in your custom quote — based on fleet size and engagement model (T&M, Managed Services or Staff Augmentation).
